

International Conference Community Health Nursing Berlin

Marta Pisà Gaià

Community Health Nursing (EFyC) at CS Santa Maria (GAP Mallorca – IBSALUT)

Martin Schunack

M.A. Student Community Health Nursing (Evangelische Hochschule Dresden) and
Head of Nursing Department at ELBLANDKLINIUM Radebeul

Agenda

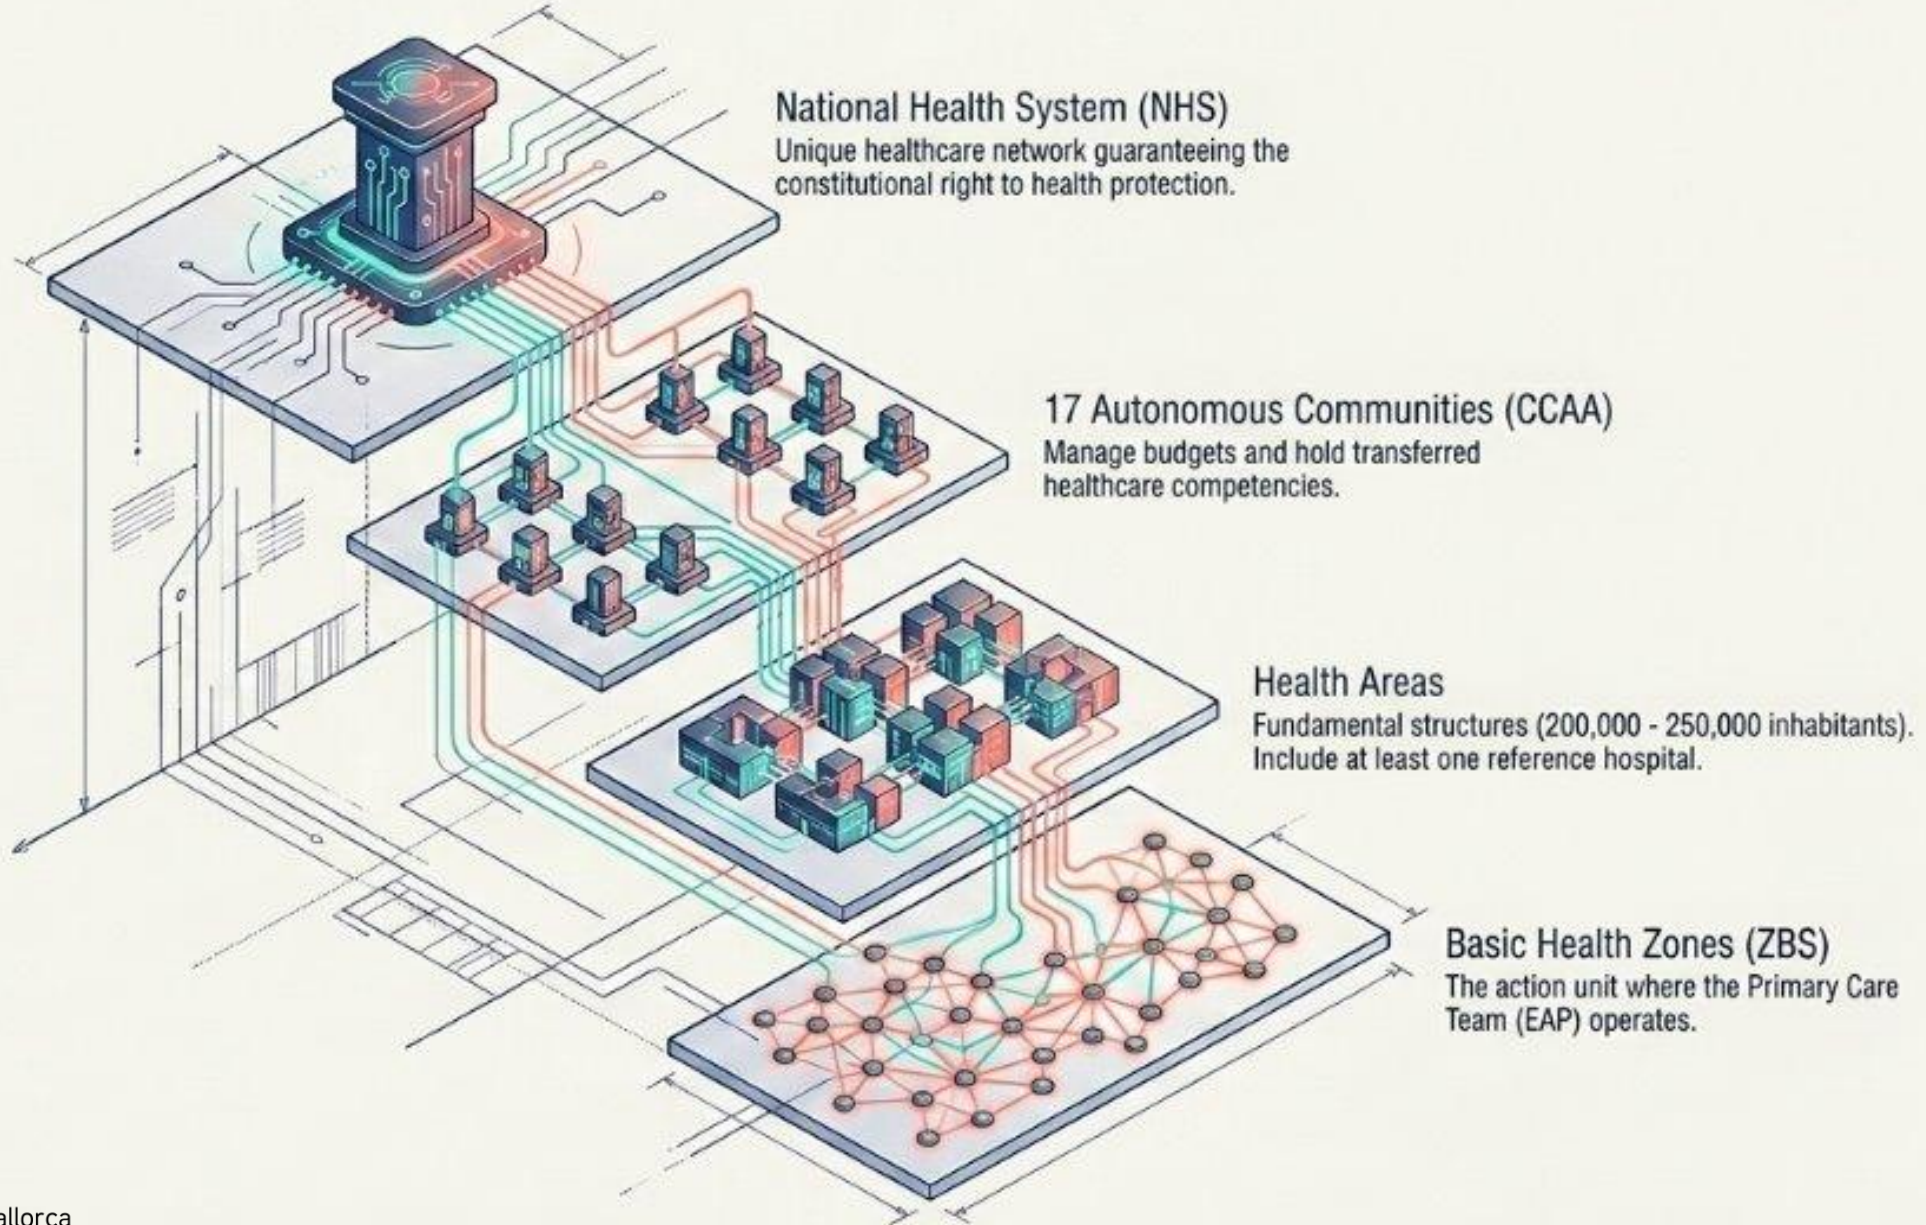

Marta

- Financial system Beveridge vs Bismarck
- Structure CdS y UB y PAC and EAP target
- Educational system EFic
- Historical changes in EFic
- The sphere of competencies

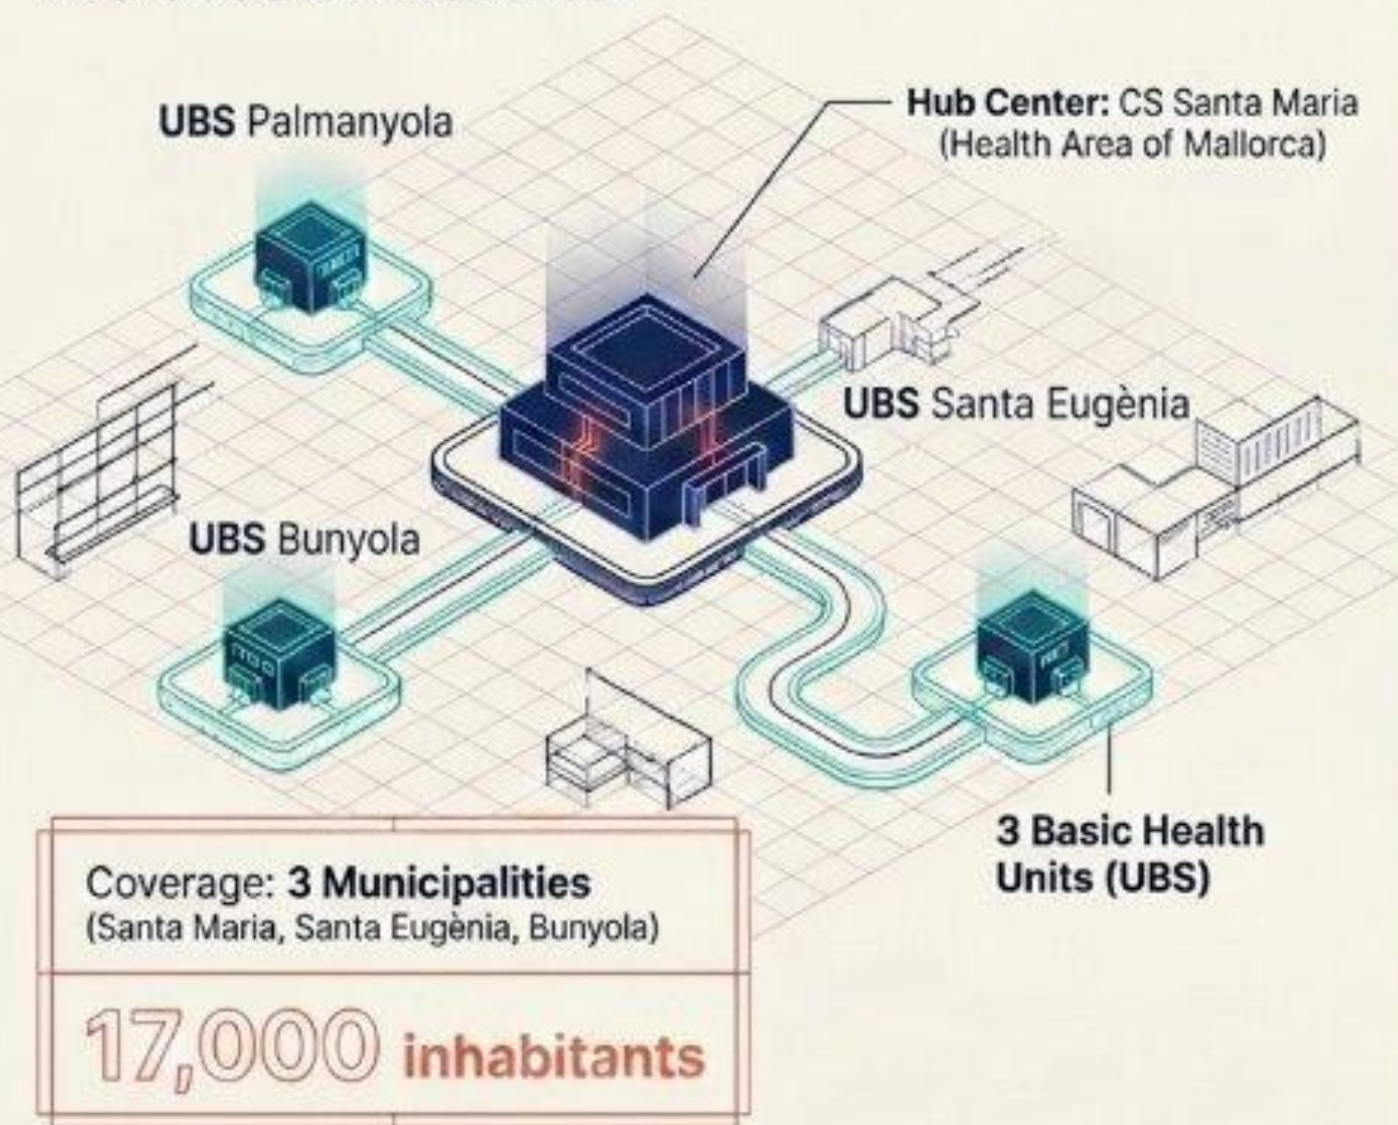

Martin

- District Meissen: geographics and population, epidemiology, demography and nursing demands
- Status quo: health care providers
- 5 steps implementing of CHN@District Meissen as an appeal

The Beveridge Model: From State to Community

Anatomy of a Basic Health Zone: The Case of Mallorca

The Primary Care Team (EAP)

13 Nurses (including 2 for pediatrics)

Average quota: **1,750 patients** per adult nurse.

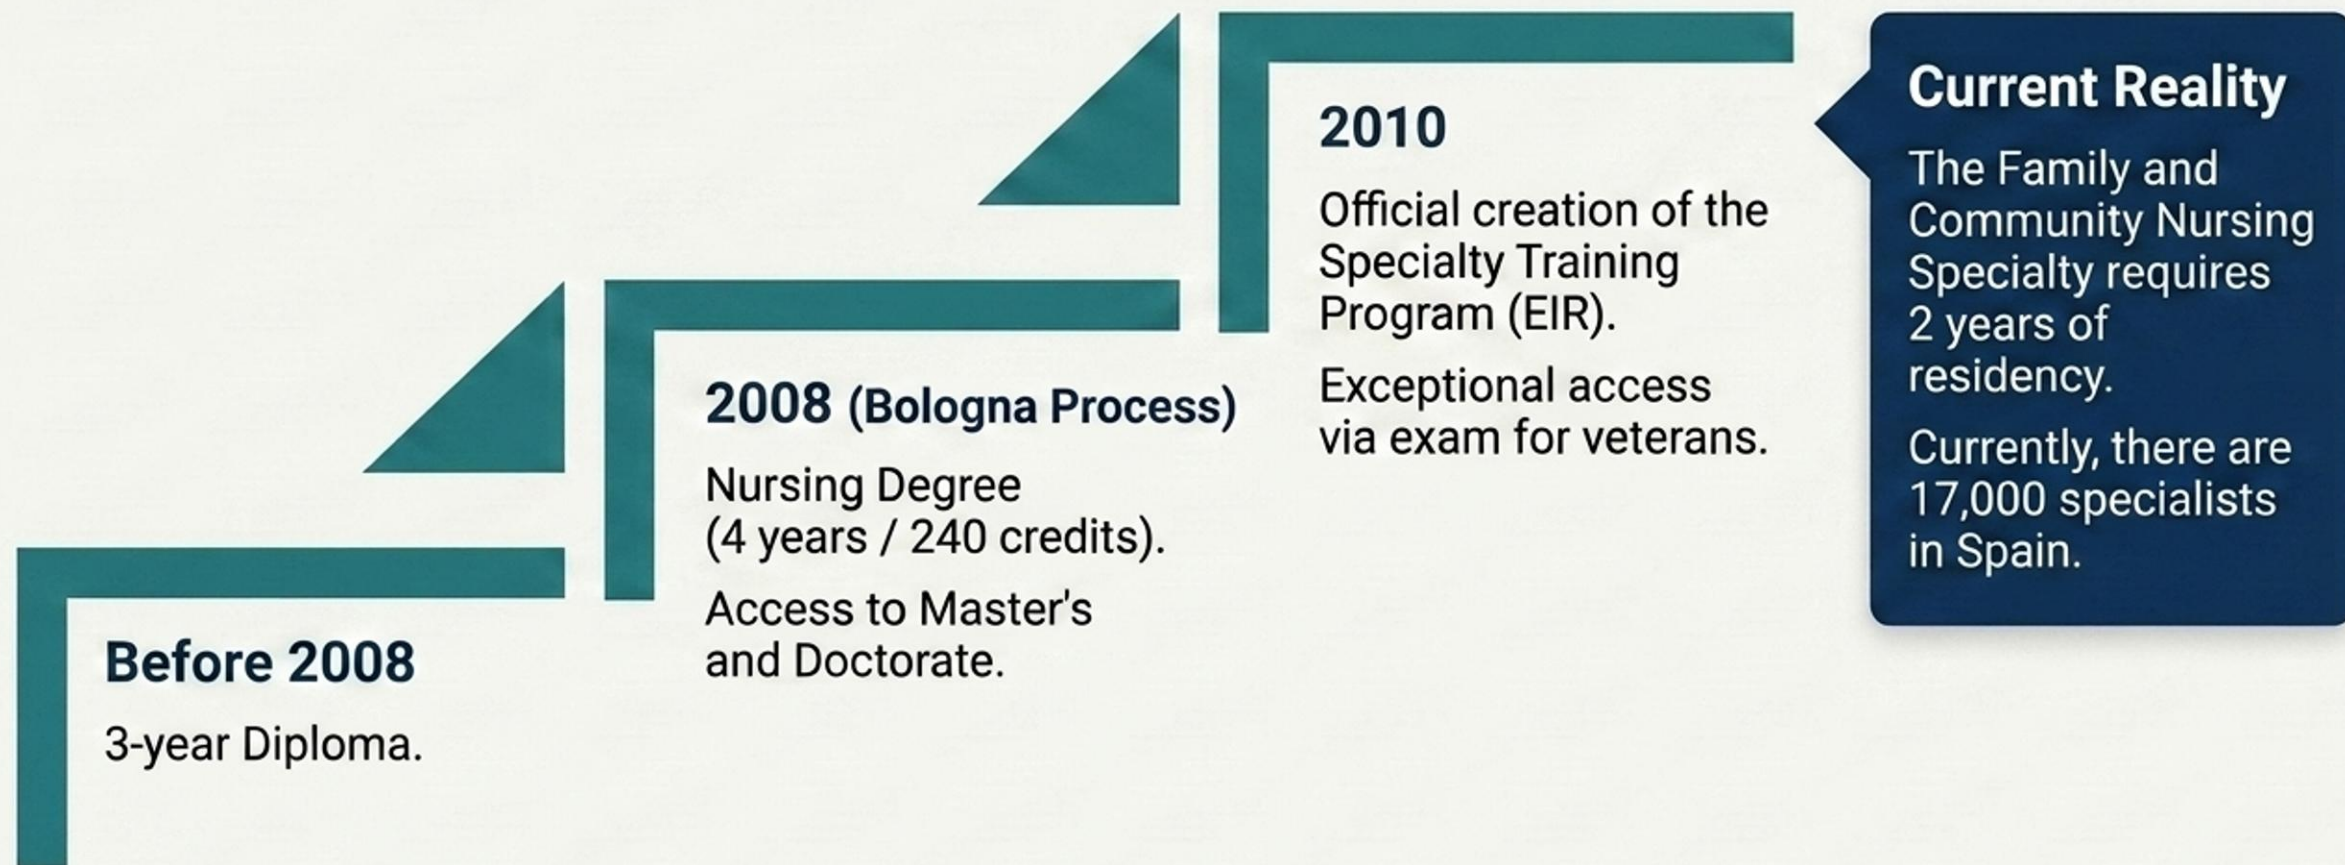

10 Doctors / 2 Pediatricians

1 Midwife / 7 Administrative Staff / 2 HCAs

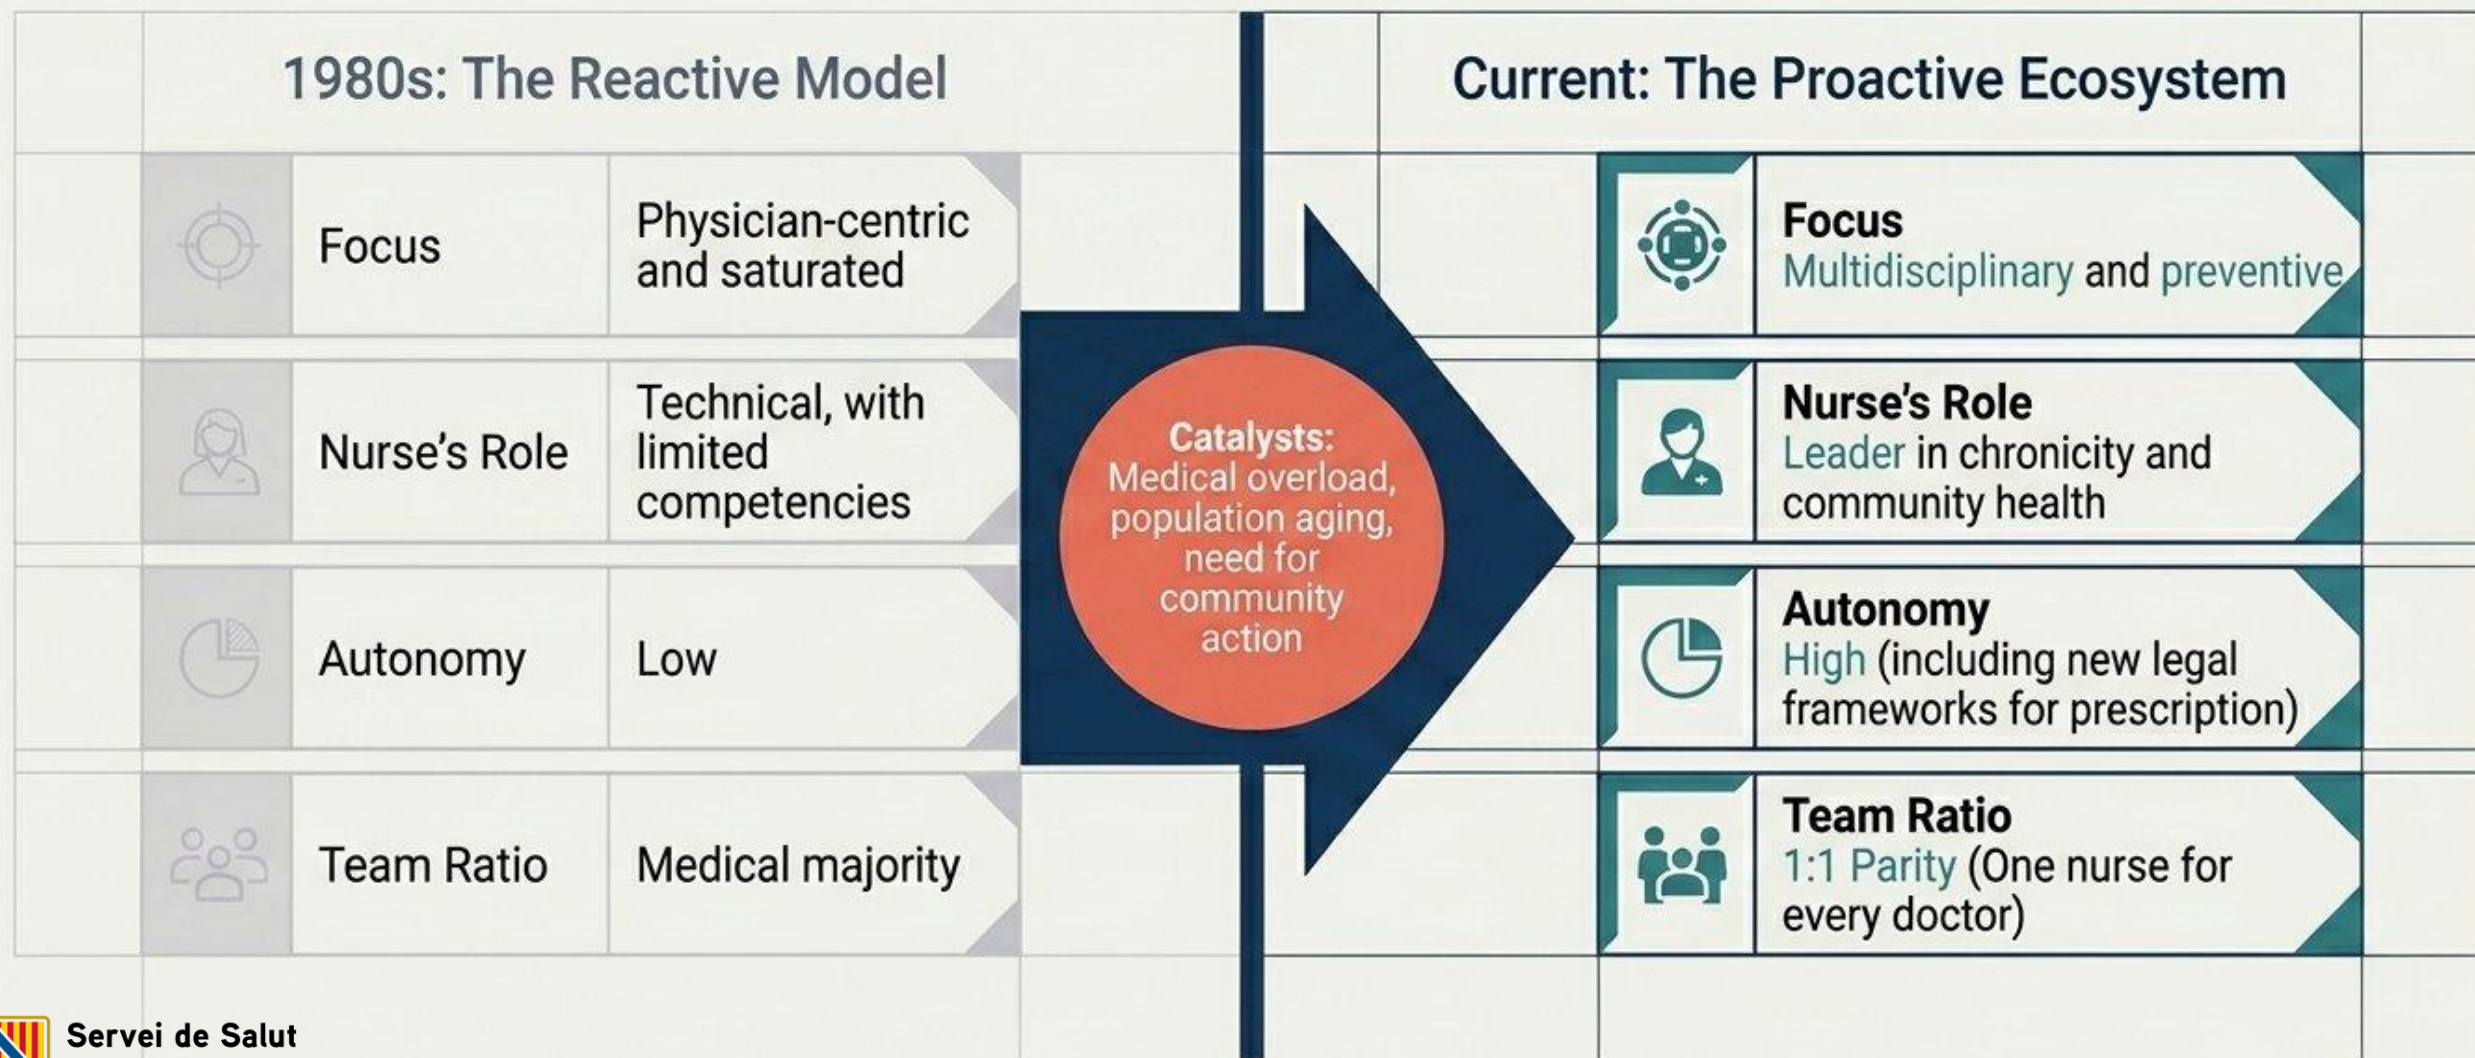

Nursing Academic Evolution in Spain

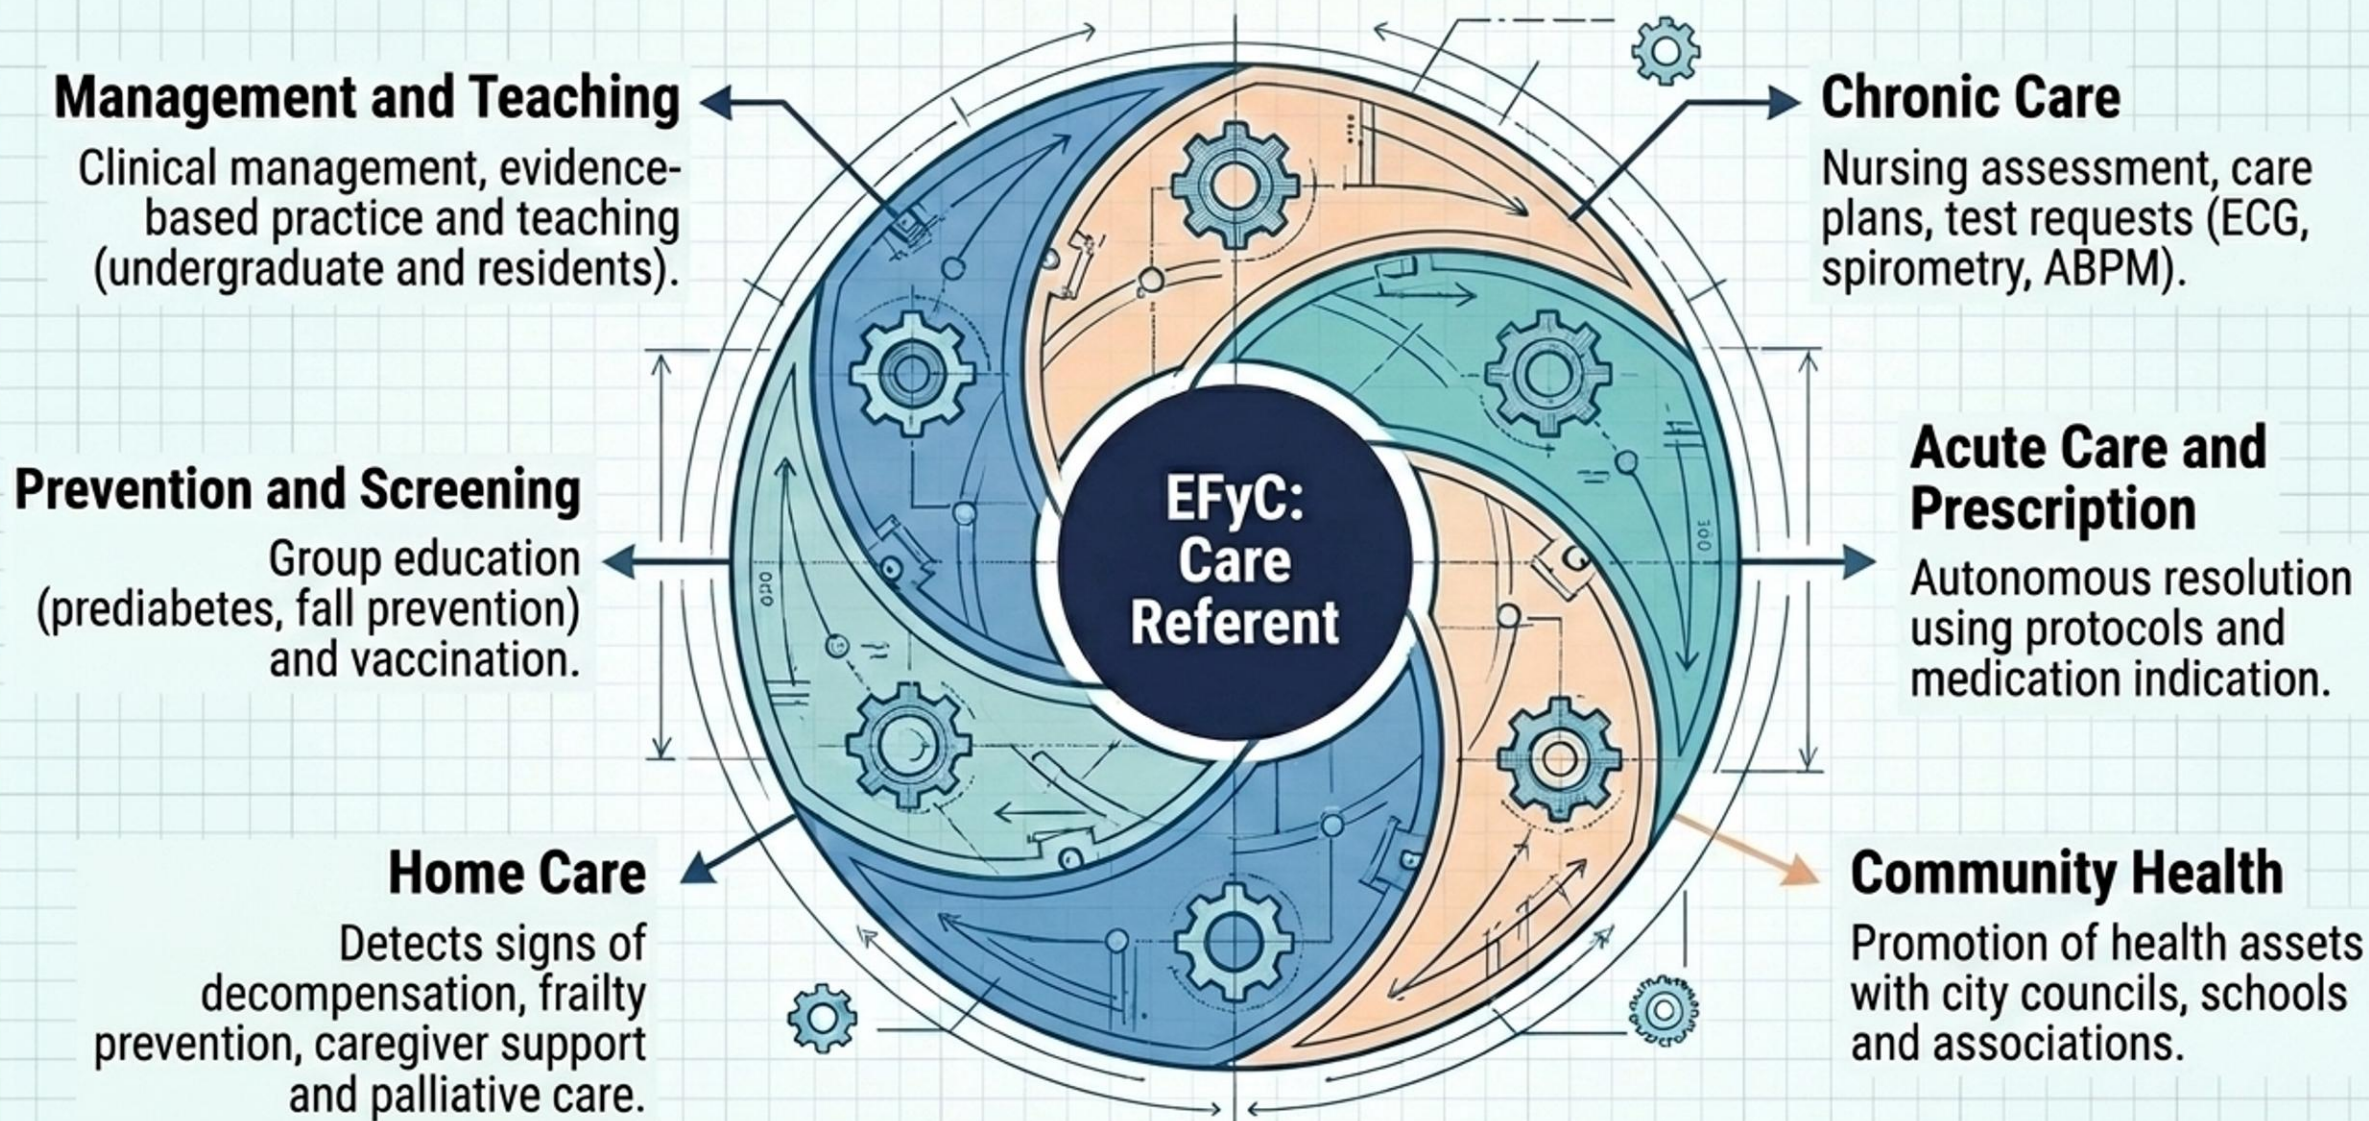

Other recognized specialties: Geriatric, Midwifery, Pediatric, Mental Health, Occupational.

The Paradigm Shift in Primary Care

The Sphere of Competencies

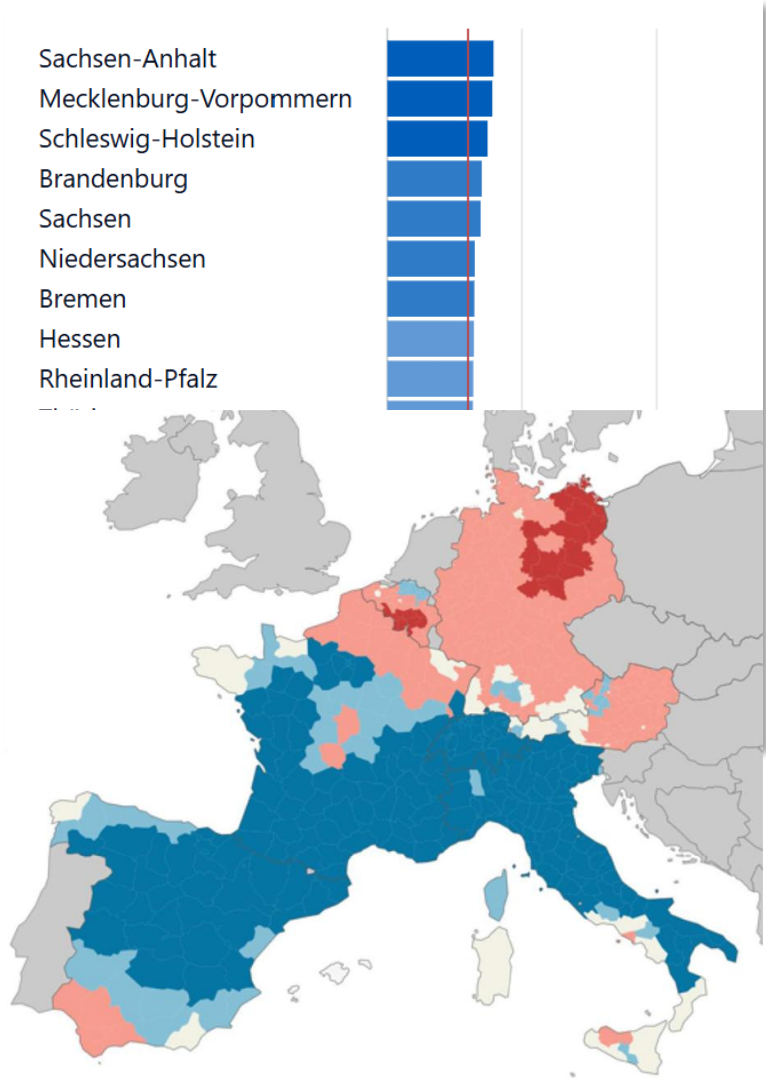

District Meissen: geographics and population, epidemiology, demography and nursing demands

(Landkreis Meissen, 2025)

Habitants	238.981 (decreasing 0,6% p.a.)	
Age group	part of	
<20 Jahre	ca. 18 % (decreasing)	
20–64 Jahre	ca. 55 %	
≥65 Jahre	ca. 27 % (increasing)	
Federal State	2021	2023
Saxony	310.674	363.243
District	Need for care	
Görlitz	10.0 %	
Meissen	8.6 % (2nd Saxony)	
Bautzen	8.4 %	

(Statistisches Landesamt, 2025)

(Stroisch, 2025)

Status quo: health care providers (pictures AI-generated)

General medical doctors:

- nearly 2.800
- 2026 a lack of 370
- 12 % < 40 years
- 29 % ≥ 60 years

(Köpping, 2025, data saxony)

Ambulatory caring services:

- 105 companies (Pflegetotse, 2026)
- Increasing lack of qualified and non-qualified caregiver
- difficulties in economics
- lack of providers in rural areas

(Caritas, 2025, data district Meissen)

Hospitals' problems:

- Outpatient shifting
- Capping of care budgets
- Reduction of occupancy
- Centralization of services (service groups)
- too many hospitals compared to abroad

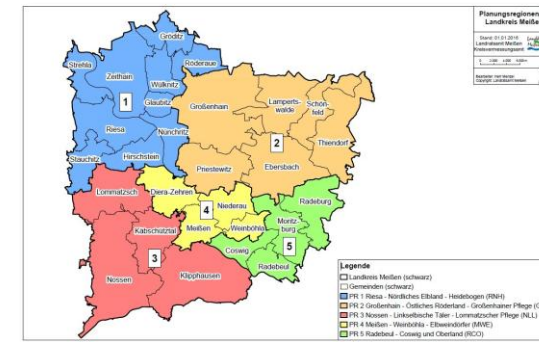

(WIDO, 2025)

5 steps implementing of CHN@District Meissen as an appeal:

1. @health insurance providers: Avoiding costs for disease treatment through investing in CHN, there is an ROI and it's not expensive as we think: reduce 6 KTEP of 1.000 and finance 1 CHN (incl. additional costs).
2. @politics and government: Look abroad and just make a law, because CHN can counsel, but CHN as an APN can do a lot more (diagnostics, basic emergency care, ...)

3. @health care providers: Let's start first in 5 planning regions with 5 CHN as coworking powerful team and assist second 4 experienced (academic) nurses with specialization (f.e. pain, heart, dementia care, diabetes care nurse)

(Landkreis Meissen, 2025)

4. @public administration: Connect each other, because CHN is always a part of a multiprofessional team.
5. @nursing staff: Stay optimistic and persistent, because it's a long way to a nation-wide coverage of primary health care by nurses.

Reminder: Useful for CHN around the world is
international collaboration!

Thanks a lot to the multiprofessional team of the Centro de Salut en Santa
María del Camí! (february, 2026)
